Strength | Unmatched Protection | Stability

ABOUT AMERICAN STRUCTURES & DESIGN

AS&D is a premier US-based designer, manufacturer, and distributor of aluminum railing, balcony, sunshade, and patio cover systems. We sell exclusively to dealers, distributors, and wholesalers in the residential and commercial construction industries.

WHO WE SERVE

We are proud to serve dealers, professional fabricators, and installers across North America. For customers that are based in the Pacific Northwest, we offer will-call in our Portland, Oregon and Sumner, Washington facilities.

UNRIVALED CUSTOMER SERVICE

As a family-owned manufacturer, we prioritize you and your company to reduce installation challenges so you can focus on bringing your customers' visions to life. Our experienced customer service team will assist you with takeoffs ensuring accurate designs and material orders. At AS&D, we're more than happy to assist you and your company each step of the way. There's nothing better than working and completing a project together.

STUNNING SPACES AND MINIMAL UPKEEP

At AS&D, we pride ourselves in offering great patio cover options for everyone. Mix and match panel types, colors, lattice wrap, and accessories to customize an outdoor space that meets your unique needs while offering high quality UV and rain protection. Our products and design can be applied in multiple settings, including outdoor living spaces, hot tub covers, car ports, and more! With affordable price points, quick installation from experienced crews, and low-maintenance aluminum post structures, we guarantee a patio solution that is both functional and attractive.

ROOF PANEL TYPES

V-Pan

Flat Pan

Insulated

PolyPanel

Lattice Pergola

STANDARD FEATURES

- Strong, durable aircraft grade aluminum
- Minimal long-term maintenance
- Withstands inclement weather and snow loads
- Easy-to-clean gutter system with 3 ½” opening
- Multiple finish colors
- Varied price points

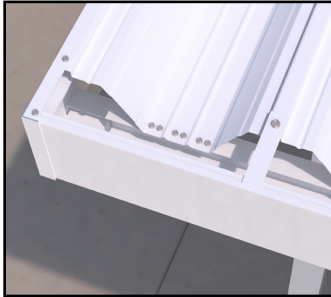

ROOF PANEL OVERVIEW

Our V-Pan, Flat Pan, and Insulated Roof Panels each bring unique strengths to your patio design. Our most affordable option, V-Pan, offers a simple no-nonsense design. The Flat Pan provides a sleek, refined shape and supports design details such as ceiling fans and lighting. Our Insulated Panels boast a laminated all-weather foam core with multiple thickness options that can easily convert to an enclosed outdoor space.

Framework Parts and Hardware:

Panel connection to gutter, gutter clip to panel using a corner

Support System

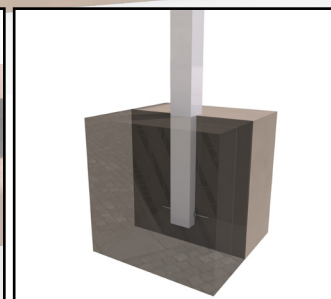

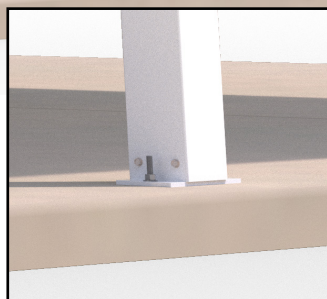

Parts and I-Beam:

Panel connection to I-Beam, post and bracket connection to I-Beam

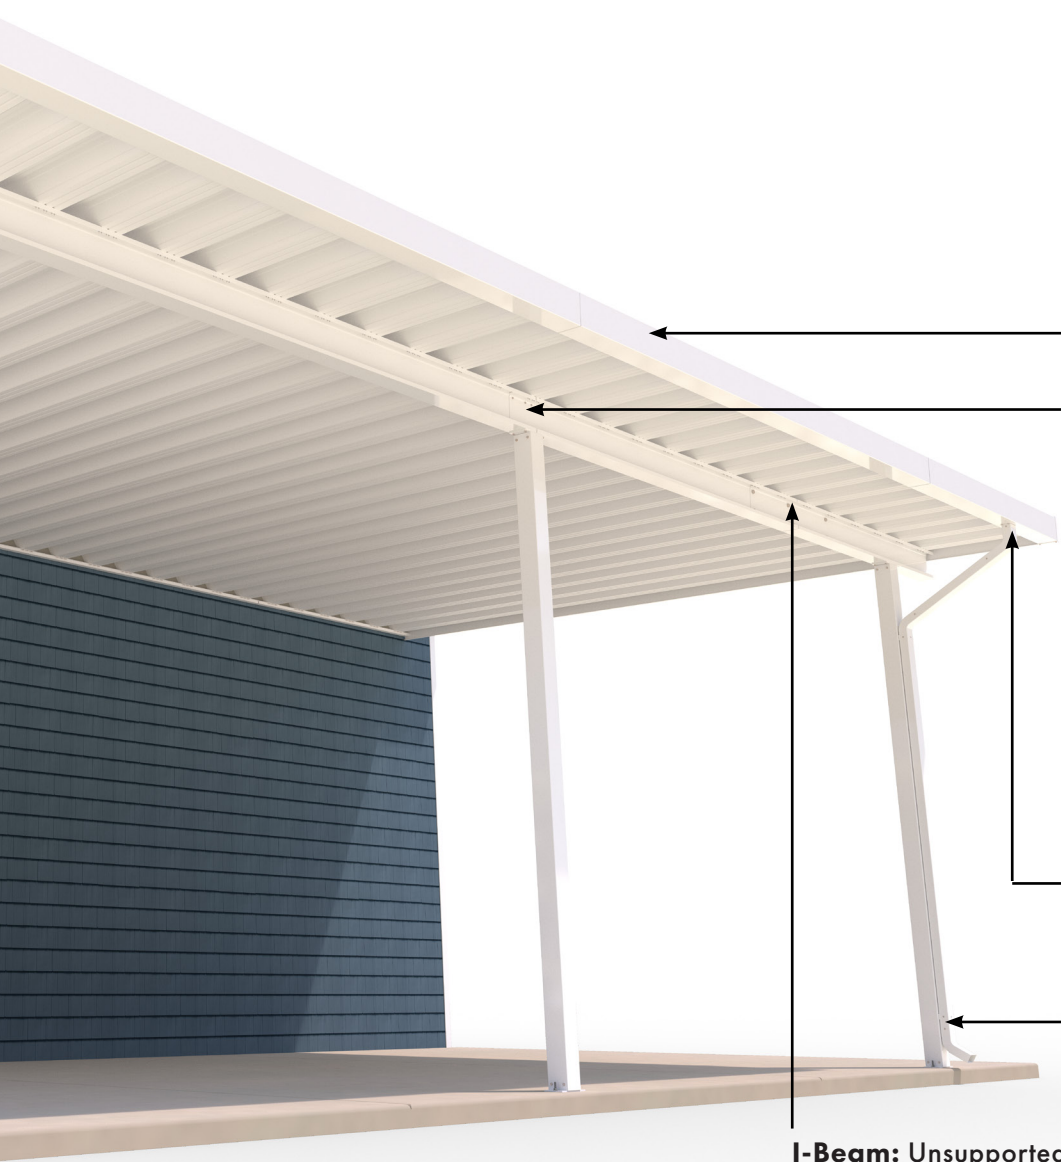

Framework Parts:

Hanger and hanger rail attached to structure and panel attachment to hanger

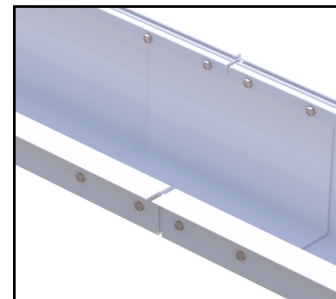

Surface mount to concrete *Optional: post in concrete footing*

Framework Parts:

Use gutter splice to extend gutter beyond maximum extrusion length

Support System Parts and I-Beam: Post connection over I-Beam splice

Framework Parts and Hardware: Gutter to downspout connection

Hardware: Downspout to post attachment

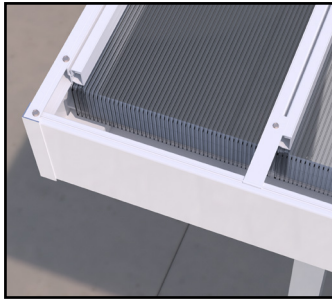

I-Beam: Unsupported I-Beam splice connection to accommodate larger post spans

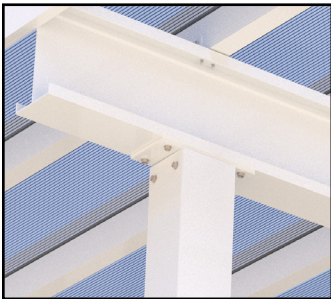

POLYPANEL OVERVIEW

Our most elegant panel option, PolyPanel, offers a classy skylight effect for your outdoor space. Enjoy the natural light of your patio or balcony while protecting against inclement weather and harmful UV rays. Available in three striking colors (bronze, clear, and white), our PolyPanel option will bring your design dreams to life and create an inviting space for hosting gatherings or relaxing on your own.

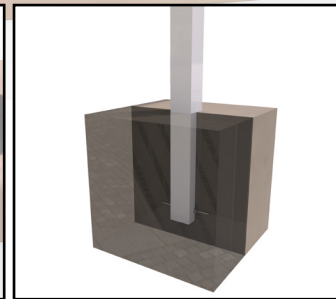

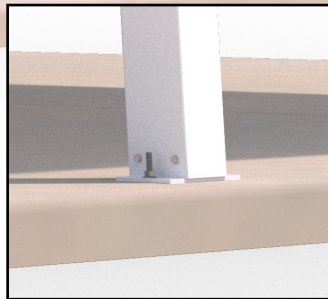

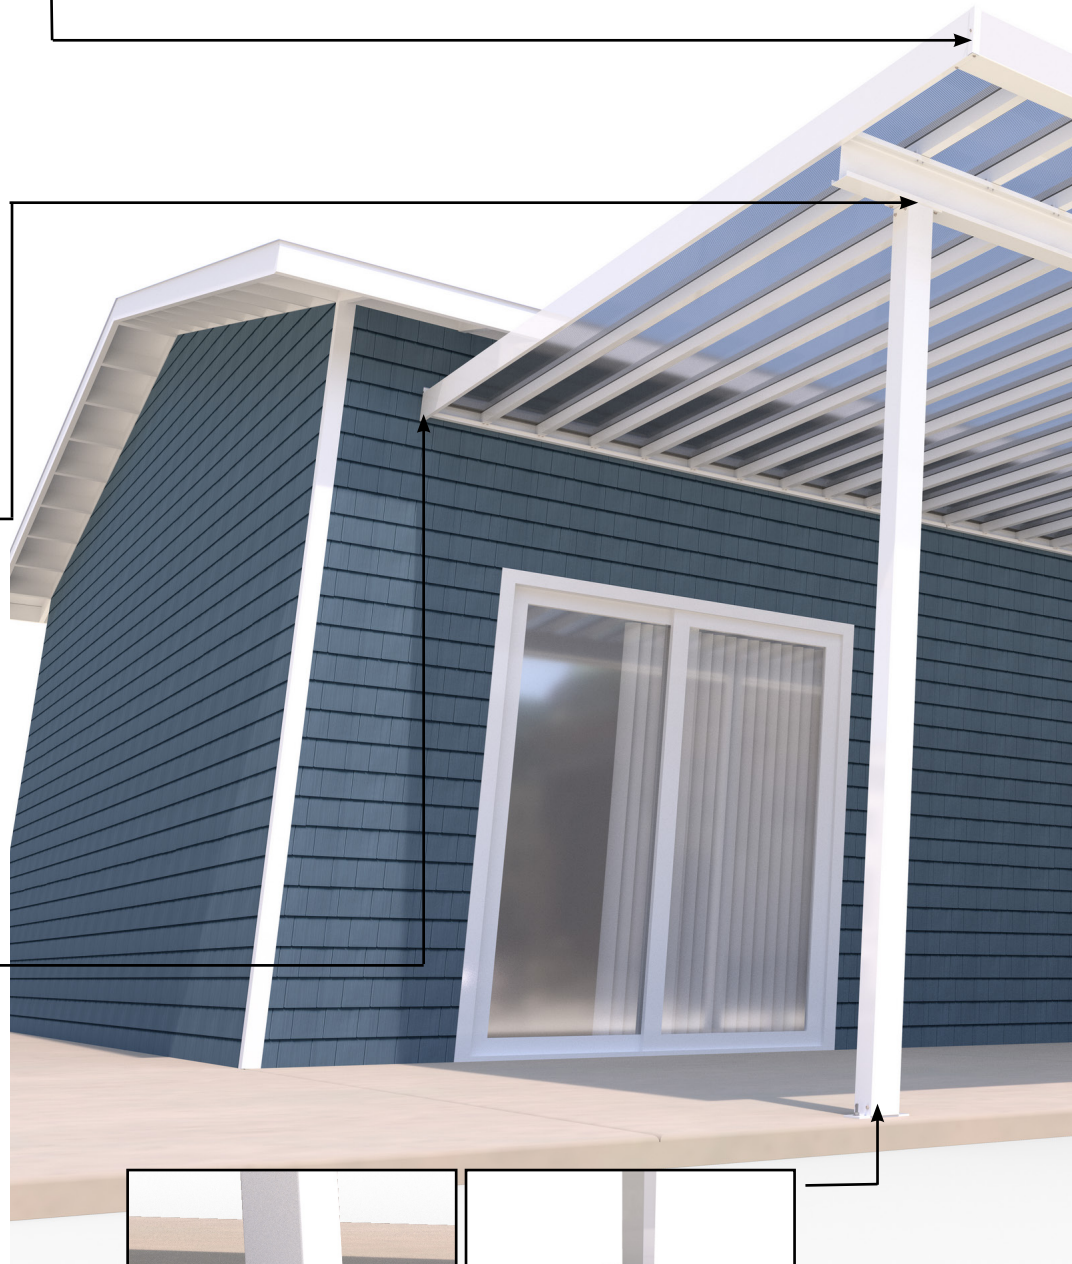

Framework Parts and Hardware: T-bar and snap bead connection to gutter, gutter clip to T-bar

Support System Parts and I-Beam: Post to beam connection

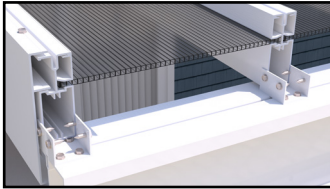

Framework Parts: Hanger and hanger rail attached to structure. T-bar attachment and hanger snap bead to hanger.

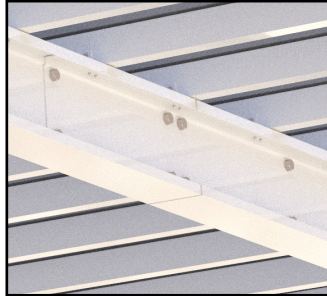

Surface mount to concrete *Optional: post in concrete footing*

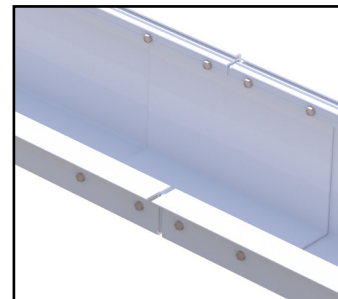

Support System Parts and I-Beam: T-bar to I-Beam connection

I-Beam: Unsupported I-Beam splice connection to accommodate larger post spans

Framework Parts:
Use gutter splice to extend gutter beyond maximum extrusion length

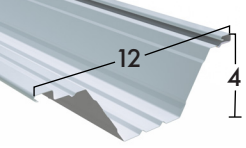

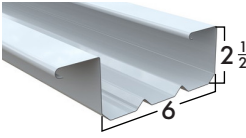

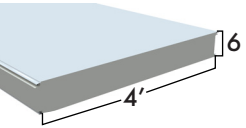

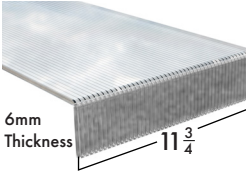

Framework Parts and Hardware: Gutter to downspout connection

Hardware: Downspout to post attachment

Support System Parts and I-Beam: Post connection over I-Beam splice

V-Pan: Great quality and value at an affordable price point. The largest span in the industry, up to 20', at a 25lb snow load.

Insulated: All-weather insulated system with three foam core thickness options: 3", 4 1/4", 6". Easily converts to an enclosed outdoor space and supports ceiling-mounted accessories.

Flat Pan: Offers a sleek, refined aesthetic, and boasts a 19' span at a 25lb snow load. Add ceiling-mounted accessories for the optimum outdoor experience.

PolyPanel: Elegant "skylight" polycarbonate panels allow light in, while keeping weather and harmful UV-rays out. Create striking designs with three color choices (bronze, clear, white).

ROOF PANEL QUICK OVERVIEW

FEATURES	V-Pan	Flat Pan	Insulated	PolyPanel
Spans from house to gutter/beam	20'	19'	10'-20'	20'
UV and rain protection				
Accommodates snow loads				
Supports ceiling fans, track or recessed lighting				
Low maintenance aluminum components				
Investment	\$	\$\$	\$\$\$	\$\$\$\$

Important Note: It is the customer's responsibility to check local building codes for snow load and wind uplift requirements. Customers must also secure appropriate building permits and any additional site-specific engineering. Contact an AS&D sales representative for standard engineering documentation.

LATTICE PERGOLA OVERVIEW

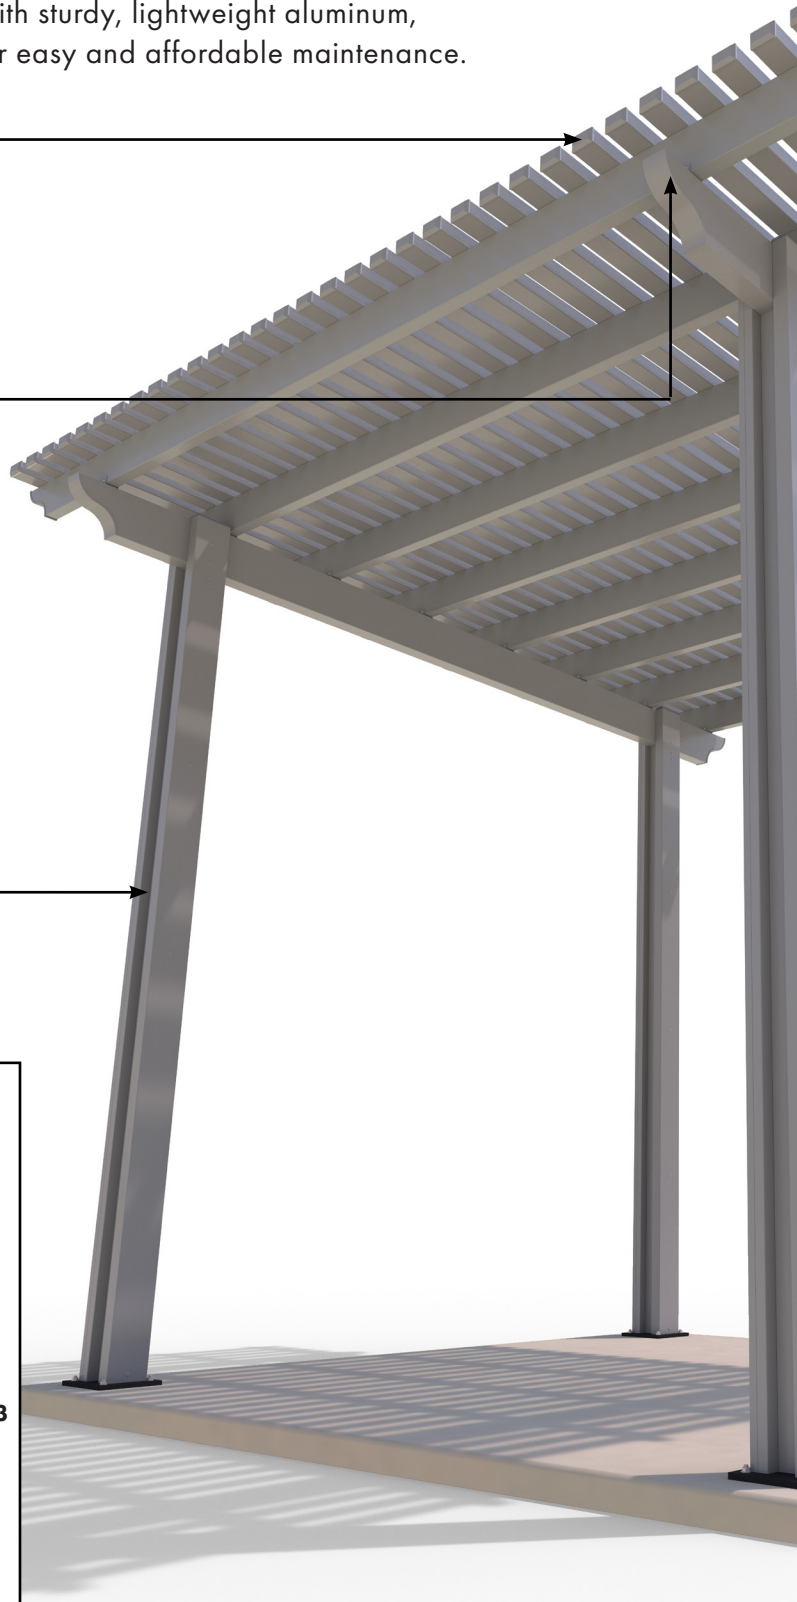

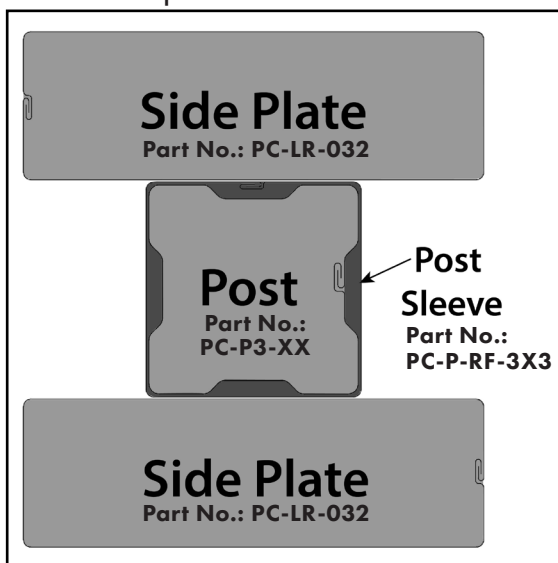

Add shade and sophistication to your backyard, garden, or patio space with our Lattice Pergola design option. Perfect for locations with minimal rain, the Lattice Pergola design reduces direct sunlight exposure up to 60%. The structure's pillars and cross beams are finished with baked enamel in nine color options. Built with sturdy, lightweight aluminum, they do not rot, swell, twist, or fade over time, making for easy and affordable maintenance.

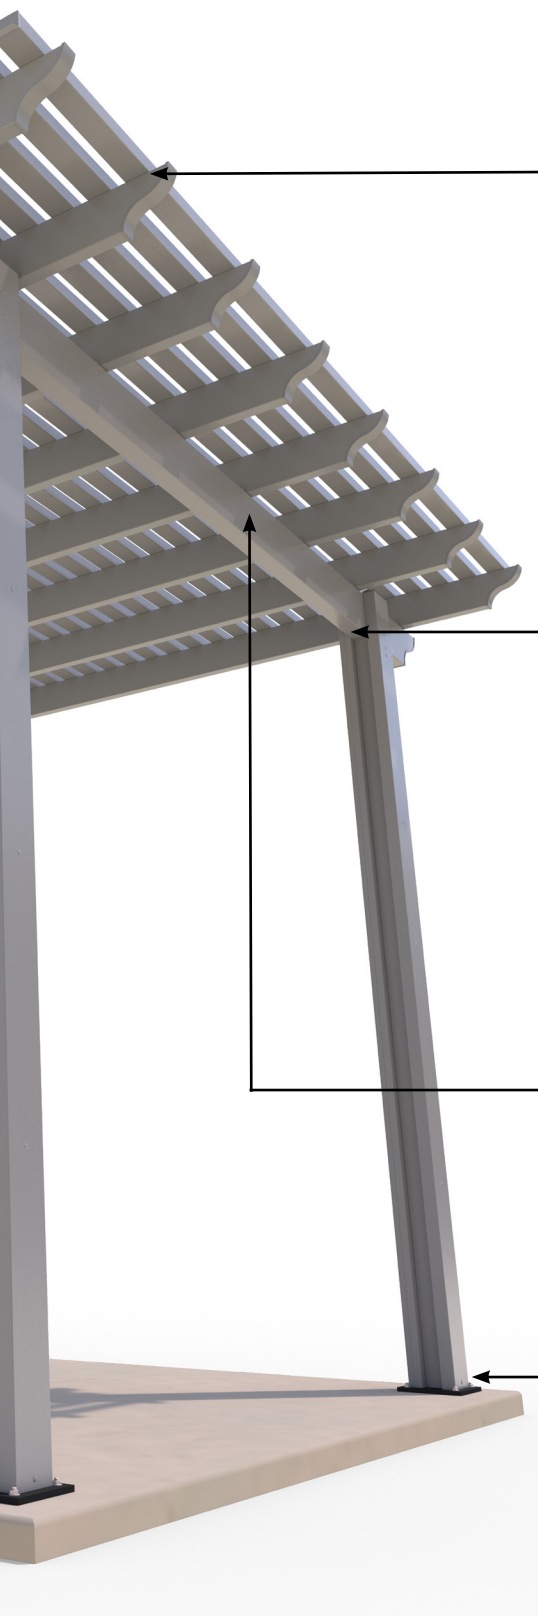

Lattice Parts: —————→
2" x 3" lattice tubes with
end cap. Other size options
available: 2"x 2" and 3"x 3"

Lattice Parts: —————→
Tube-to-rafter, rafter-to
beam connection

**Support System Parts
and Lattice Parts:** —————→
3" smooth post with sleeve
and 2"x 6" lattice rafters
used as side plates

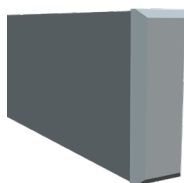

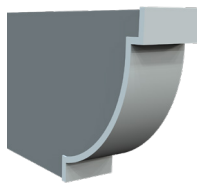

Lattice Parts:

Lattice rafter with scallop end cap

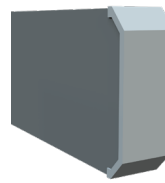

Other end cap profiles available:

Bevel

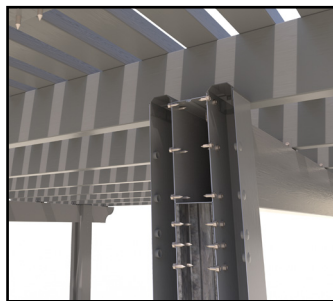

Corbel

Miter

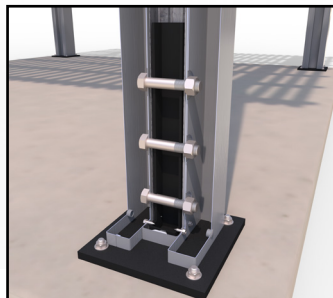

Lattice Parts and Support System:

Post-to-beam connection

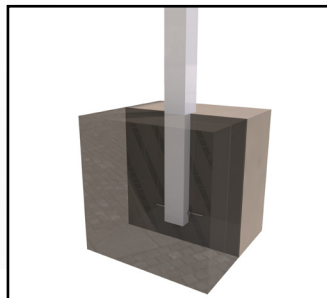

Lattice Parts:

3" x 8" lattice beam with optional end caps

Surface mount to concrete

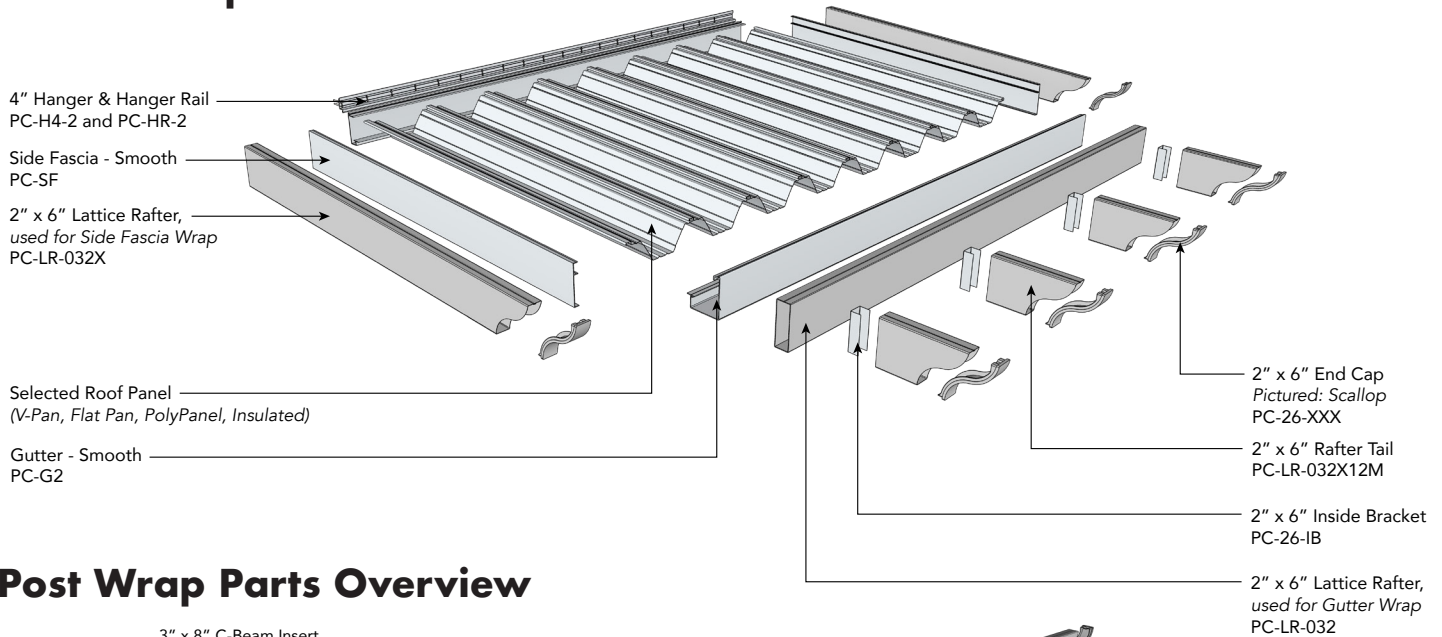

Optional: post in concrete footing

Overview

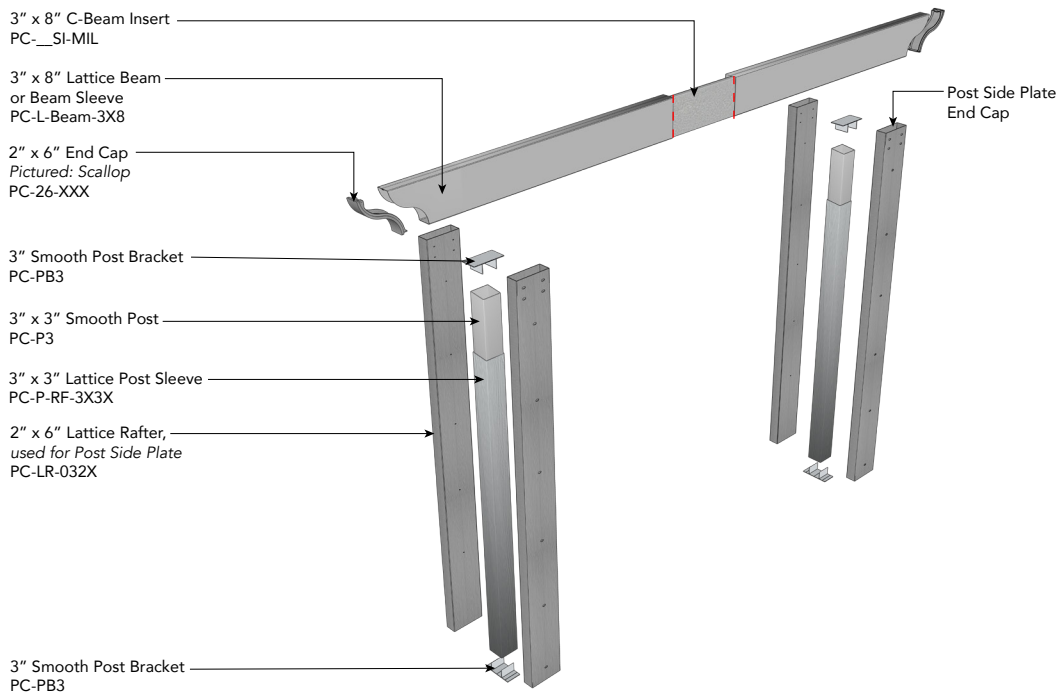

Lattice Wrap is an optional, non-structural, aesthetic upgrade. The methods of installation described in these instructions are best practices. The finished design can be modified depending on each individual's desired look.
