

# Inside-of-Post to Inside-of-Post Mount \_\_\_\_\_ Wood Posts

## Straight Cable Runs and Cable Runs through One Corner

Deck 1 has only one end post at the corners. The posts next to the house butt right up to it so the back sides of those posts are not accessible. Run #1 is still outside to outside, so it will take a Series 262 kit. Runs #2 and #3 connect to the *inside* of the corner post going back toward the house to keep the cables on the same plane. They also connect to the *inside* of the posts next to the house as well.

### Applicable kit is the 300 Series.

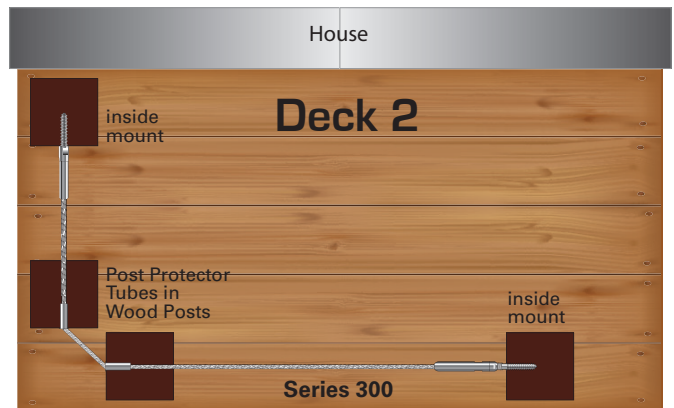

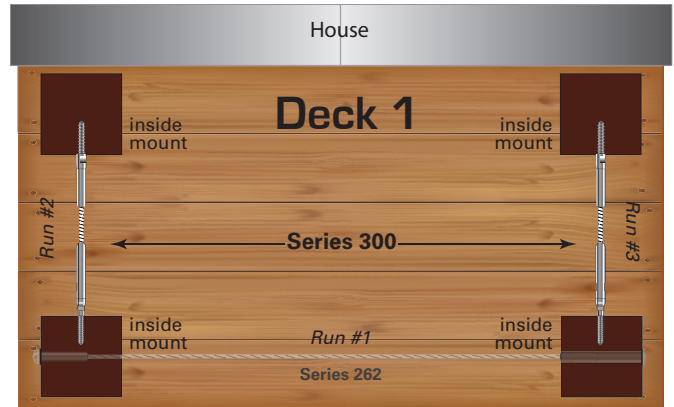

The tensioning device is an Adjust-a-Body® with Hanger Bolt, which lags into the wood post on one end. A Push-Lock Lag is lagged into the other end.

## Cable Runs through Two Corners

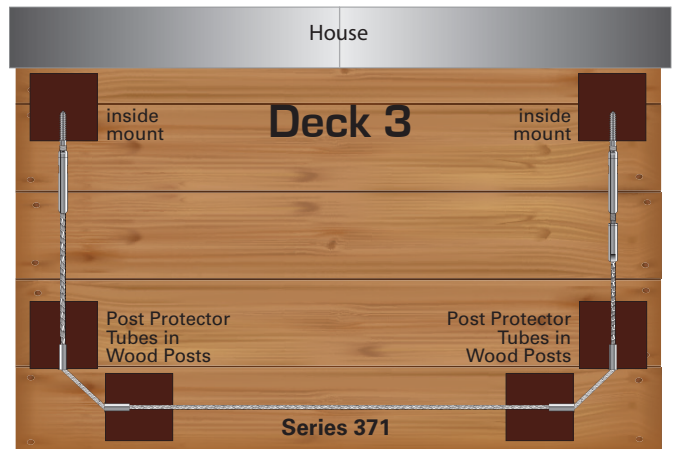

When going around two corners, it's necessary to tension the cable from both ends as shown in Deck 3.

### Applicable kit is the 371 Series.

The tensioning devices are an Adjust-a-Body with Hanger Bolt, which lags into the wood post on one end, and Push-Lock Turnbuckle with Hanger Bolt on the other end.
