view-thru window awning installation instructions

1. READ THESE INSTRUCTIONS BEFORE BEGINNING ASSEMBLY.
2. DO NOT USE NAILS! USE SCREWS PROVIDED.
3. CHECK THAT EACH BRACKET IS PROPERLY SCREWED
4. DON'T HURRY YOUR WORK!

STEP 1.
Locate points 'A' and 'B' for installing 'U' Brackets on wall or casement. (Fig 1)
Locate above and outside window openings or on sash. Before screwing 'U' brackets ('C' & 'D') to wall, check available mounting area directly below to receive return arms ('E').

STEP 2.
Insert Stringers into Wall Brackets at 'A' and 'B' and attach by inserting cotter pins (Fig. 2).

STEP 2.
With Stringers hanging against the wall, guide panels ('G') in from one end by hooking the edge of panel over top lip of the singer. Keeping the stringers in the vertical position. Contor the panels with equal over-lap in respect to the window. Start from top to bottom and snap each panel over front edge of the stringer.

STEP 4.
Attach Return Arms to 'U' Brackets ('C' and 'D') with collar pins. Attach Return Arms Extension ('H') to return arm with cotter pin.

STEP 5.
Raise front of awning and attach return arm extension to stringer at desired angle by punching out appropriate hole in stringer. Connect with cotter key.

RESIDENTIAL / COMMERCIAL

FOR EXTRA LONG WINDOW INSTALLATIONS

Panels of different lengths may be snapped together to obtain any width desired.

EXAMPLES

NOTE: There will be items in package that are not required for those applications
